Solution

The original website has two inputs.

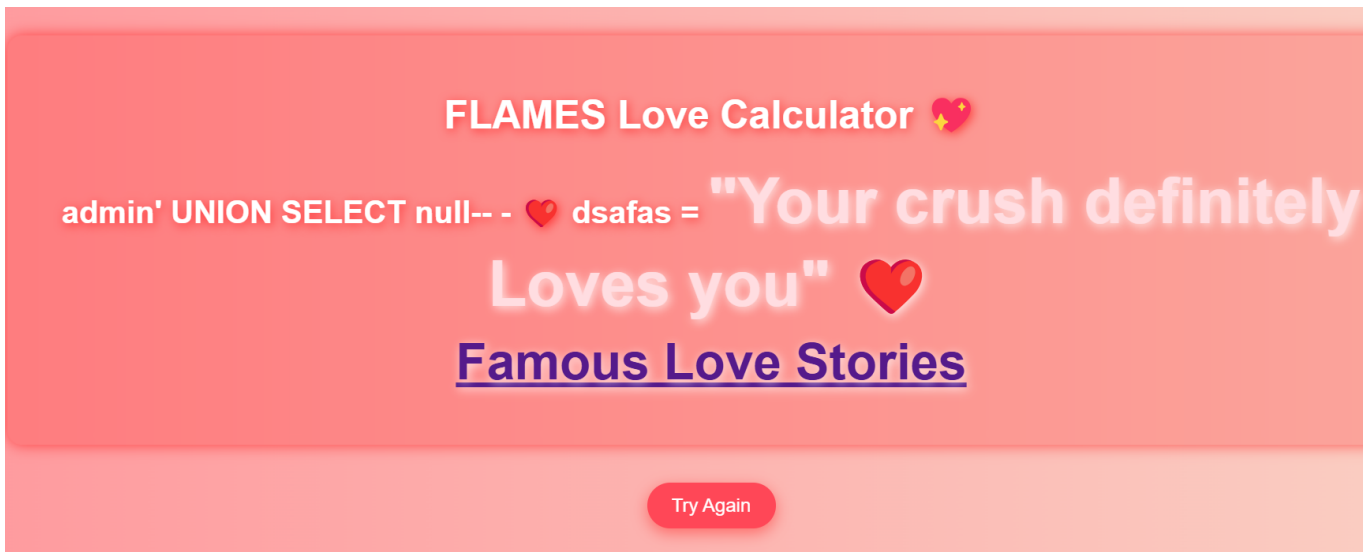

We can try both XSS and SQLi.

This SQLi reveals another url

The screenshot shows a web application titled "The Forgotten Query of Love" with a dark theme. The title is in a glowing cyan font, flanked by floppy disk icons. Below the title is a pink instruction: "Enter your names and uncover your fate...". There are two input fields with cyan borders. The first field contains the SQL payload "admin' UNION SELECT null-- -". The second field contains five dots ".....". Below the fields is a pink "Submit" button with a small icon.

The screenshot shows a web application titled "FLAMES Love Calculator" with a pink background. The title is in white with a heart icon. Below the title, the SQL payload "admin' UNION SELECT null-- -" is followed by a heart icon and the text "dsafas =". To the right, a large white message reads: "Your crush definitely Loves you" with a heart icon. Below this is a link "Famous Love Stories" in purple. At the bottom is a red "Try Again" button.

Which is the flag

Throughout history, love has shaped destinies, inspired poets, and changed the course of wars. Here are some of the most famous lovers who defied all odds to be together:

Romeo ❤️ Juliet

Laila ❤️ Majnu

Shirin ❤️ Farhad

Heer ❤️ Ranjha

Tristan ❤️ Isolde

Cleopatra ❤️ Mark Antony

Paris ❤️ Helen

Do you believe in destiny? Love stories like these remind us that some hearts are meant to beat as one. ❤️
